

## Bilz-Products in application

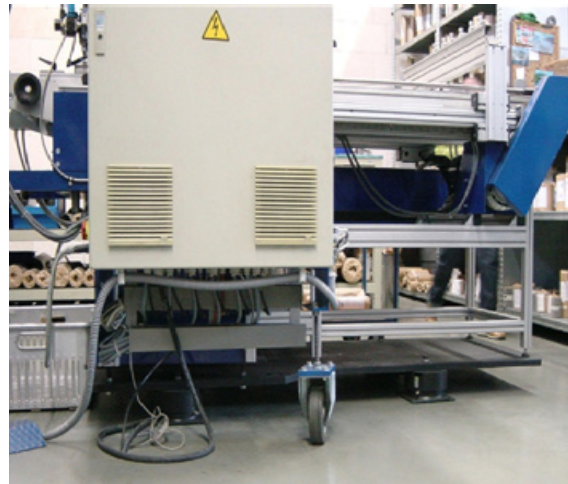

### Folding machine Karl Rabofsky, Model R176PC

Automatically folds filter inserts made of metal and other materials for industrial liquid filters

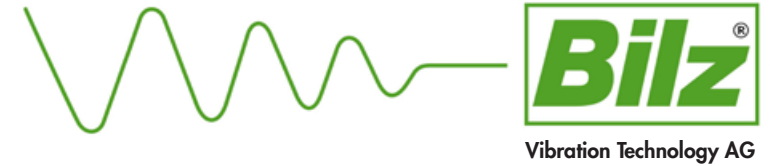

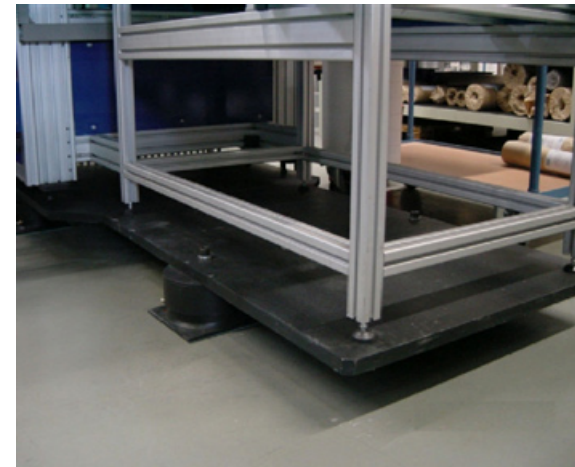

**Equipment:** BILZ® Load Distribution Plates with geometric adaptation to machines and BILZ® Rubber Air Springs FAEBI® 150-Soft (fe ~ 5 Hz) with protective hoods

**Exigence particulière:** Machine vibration had been loudly transmitted into neighbour-

ring office space by the building foundation. The machine does not have its own rigid stand and it was critically important not to exceed the building floor's maximum load.
